Calculated risk taker

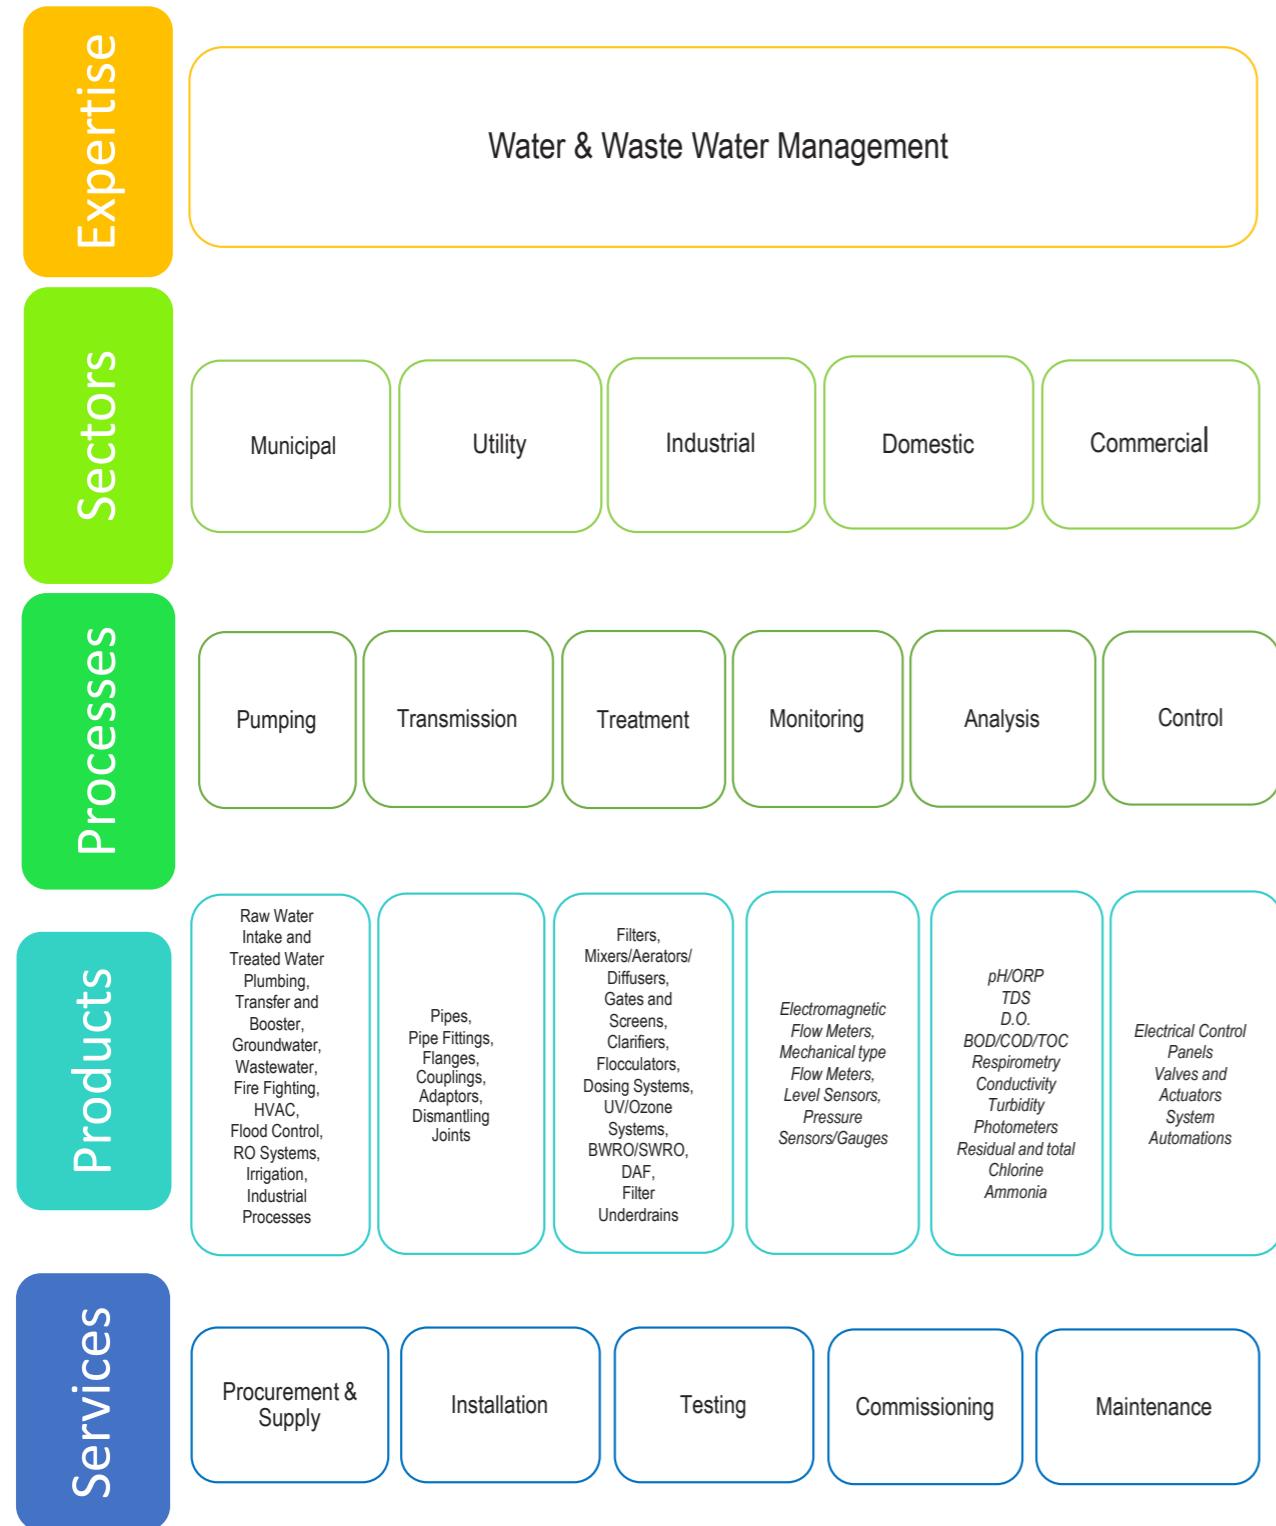

After completing his B.Eng. in Electrical and Electronic Engineering at Imperial College London (ICL), Lasith returned back home, to Sri Lanka, to take up the next challenge, joining the family business. On-hand training to the various departments, including Sales and Marketing, Logistics, Warehousing, Finance, HR and IT, the responsibilities have given a wide exposure and experience, and was further polished executive training at the National University of Singapore (NUS) Business School and an executive MBA programme at Postgraduate Institute of Management (PIM).

A focused and dynamic young individual, and always ready to expose to new ways of thinking. Considered to be a calculated risk taker, Lasith is ambitious over new opportunities. Lasith always looks at what is in best interests for: the company, respecting the company's goodwill in addition to the profits; and the country, maintaining the standards the country should be expected to hold.
